Public Hearings In Atomic Probe May Be Delayed

Report Closed Door Hearings Develop Situation Described As Grave

SECRET HEARINGS RESUME MONDAY

By WILLIAM THIES
(U. S. Staff Correspondent)
WASHINGTON, Sept. 11.—Congressional spy investigators said today that "grave" developments in their atomic espionage case may postpone public hearings set for next Wednesday.

The House postponement in the open hearings was threatened after the House un-American activities committee questioned Lt. Gen. Leslie R. Groves, ex-chief of the atom bomb project, and three other former Manhattan district employees.

May Delay Public Hearings
Rep. Thomas (R) N. J., committee chairman, recessed closed door hearings at which Groves appeared until Monday. He said he still hoped to begin the public testimony September 15 but that a postponement would follow if it is found necessary to "call in more witnesses to check testimony."

Another committee member said the postponement, or perhaps a week, was probable. This source declared that the testimony to date on alleged Soviet attempts to steal atomic secrets had developed a situation "which can be described as 'grave'."

Pa Newc Observes

Mrs. Florence Rameo of Millville reported to Pa Newc today that an apple tree in her back yard has blossoms on it.

Many New Castle football fans got their first look at the recently completed improvements at Taggart stadium last night and came away enthused over the new lighting system and the huge steel stadium side of the field. New Castle High now has a football stadium second to none in this area.

A new and much larger sign warning motorists of the dangerous curve, especially during wet weather, at East Washington and Chestnut streets, has been installed by the street department. The section has been the scene of numerous accidents. The sign has been placed just east of Chestnut street, to be seen by motorists descending the hill.

Workmen completed one lane of the highway Friday at the intersection of the Savannah and Old Pittsburgh roads on route 53, the New Castle-Killbuck road. A bad curve has been eliminated and the improvement will be welcomed by motorists.

Sandlot ball games about the city have given way to the fall sport of football. Pa Newc notes. Numerous kids from eight to 14 years of age bunched themselves following school Friday with the sport.

With the Sunday evening union vespers having come to an end, most of the city churches will resume individual Sunday evening services. It is learned from church announcements carried elsewhere in The News today. Several of the district Methodist churches will confine themselves just to Sunday school services tomorrow, due to the annual conference in progress at Meadville.

Dear Pa Newc: I have noticed that other people are reporting things I have one snowflake which has 118 flowers on it, and I believe this is a record. Mrs. J. J. Maher, Wampum.

Large Crowd Sees New Castle High Open Grid Season

In a setting that had a touch of Hollywood about it, the 1948 model of the "Red Hurricane" was unveiled Friday night in Taggart stadium, when New Castle high school opened the 1948 grid season.

A green velvet carpet, bathed in the light of thousands of kilowatts, a crowd of about 10,000 that almost filled the stadium, and overhead a half moon that seemed to be a trifle jealous of the man-made illumination of the scene below.

Score Didn't Hurt
It didn't hurt the setting a bit, either, when New Castle took Erie last by a score of 20-0. The gentlemen of the sports department will give you the details of how

Bridenbaugh's Bully Boys built such a score, with particular reference, no doubt, to the one-man track meet staged by Sammy Keyes, the double-barreled block of Altman, the generally sound play of the line, and the dexterous ball handling of Ralph Paolone. Here we are not interested in the—shall we say the esthetic side—of the jousting.

For this particular typewriter jockey it was the 24th of such scenes at Taggart stadium, but somehow this 24th opening night was a trifle brighter, a trifle gayer and with a trifle more promising than many of the previous ones. The crowd gathered early. Over in the student section the young

Do Not Believe Siamese Twins Will Survive Long

LANSING, Mich., Sept. 11.—(INS)—Michigan physicians predicted today the state's first "Siamese" twin girls, born in Lansing, cannot live for more than a few days.

The infants, joined at the abdomen, are in an oxygen tent at the Edward W. Sparrow hospital.

Attending physicians said the babies' heads and arms are normal, but other portions of the bodies are not completely developed. The doctors added it would be impossible to save one by separating it from the other. Hospital authorities have withheld the names of the parents.

Queuille Gets Approval As New Premier

Plunge Into Task Of Forming New French Cabinet Now

By JOHN E. LEE
(U. S. Staff Correspondent)

PARIS, Sept. 11.—(INS)—Premier Henri Queuille—approved 351 to 196 by parliament—plunged into the task today of forming a new cabinet to wrestle with France's grave economic problems.

The 64-year-old physician and veteran politician of the radical Socialist (Centrist) party received the support of his own party, the powerful Socialists, other Center parties and even some followers of Gen. Charles De Gaulle.

He needs 311 votes to win approval of a new cabinet. It will be the fourth to hold office in the past seven weeks during the most protracted cabinet crisis since the liberation.

Dr. Queuille will attempt to treat France's economic and financial ills with much the same remedies which resulted in downfall of his predecessors.

Grant Is Made For New Church

Erie Conference Makes \$25,000 Grant To Wesley Congregation Here

NEW BUILDING WILL BE ERECTED

Congregation of the Wesley Methodist church, West Washington street extension, was cheered Friday with the announcement that the church had been granted an outright gift of \$25,000 to be used in the construction of a new house of worship. The announcement was made at a session of Erie Conference which is meeting in Stone Methodist church of Meadville.

Of the total sum, which must be used for new construction, \$13,000 of the money is given by the National Board of Home Missions, while \$10,000 is a gift from Erie Conference. The church, which has a building fund in operation now, will use it along with additional funds which are to be raised in the erection of the new edifice.

Site Is Secured
The church has purchased a site for the new building at the intersection of Round and West Washington streets. The six-acre site lies between Schley street and Round street, running a distance of 1600 feet north, covering a city block.

Already work has been started on a new parsonage which will be soon completed. The parsonage is being built adjacent to the plot on which the future church will rise. With the exception of some exterior work, the new parsonage is almost completed and will be ready for occupancy soon.

The project labeled by Erie conference.

Greta Garbo Not Secretly Married

HOLLYWOOD, Sept. 11.—(INS)—A question that Hollywood has long pondered had an answer in the federal records today.

The question: Is Greta Garbo secretly married?
The answer: No.
The glamorous Swedish film star in flippers first papers for American citizenship, said she was not married, nor had she ever been.

Her declaration apparently disposed of the matter, for she made it under oath.
The records reveal that her current application is the second time the silent Swede has declared her intention of becoming a citizen.

Death Valley Hottest Spot

WASHINGTON, Sept. 11.—(INS)—The Army decided today that Death Valley, Calif., is the hottest place this side of you know where.

At least it is the hottest spot in North America. The Army started checking Death Valley temperatures in a test for hot weather clothing.

It found that on at least one day every seven years the temperature goes up to 180 on the desert floor, put the mercury drops 55 degrees to a mere 125 at five feet above ground, where official temperatures are recorded. At that level it once got up to 134, and during the week of July 7-14, 1913, it never got below 127.

Hundreds Of Small Birds Fall Dead In New York

NEW YORK, Sept. 11.—(INS)—Hundreds of small birds of sparrow size fell dead and dying into the streets around the Empire State building this morning in a phenomenon that baffled police and representatives of the American Society for Prevention of Cruelty to Animals.

An ASPCA ambulance was sent to the area to collect the dead and injured birds for laboratory tests later in the day.
Many of the injured birds covering part of the 33rd and 34th street sides of the world's tallest building chirped pathetically as ASPCA representatives, police and passers-by scooped them off the ground to try to save them.
The birds were of a variety of colors—some speckled and striped, some of almost solid green, blue and brown tones.
One initial theory was that the birds, flying northeast, had struck the side of the 102-floor building. Another was that they had been poisoned in some way, perhaps by something they had eaten in migration.
The baffling bird-fall began just before midnight and continued for several hours.

Truman-Barkley Taken Off Ballot In Louisiana

BATON ROUGE, La., Sept. 11.—(INS)—Louisiana supporters of Harry S. Truman and Alben Barkley today were figuring out a way to get the names of the two candidates back on the ballot for the November election.

The Louisiana State Democratic Central committee ordered the candidates' names removed from the ballot.

J. Strom Thurmond, the Dixiecrat presidential nominee and his running-mate, Gov. Fielding L. Wright of Mississippi, were substituted for the two regular party nominees.

In its order removing the names of President Truman and Barkley, the committee blasted the National Democratic party for putting up the incumbent. It said the actions of the party were "not at all Democratic."

Under the Central committee's order, the state's electors are pledged to vote for Thurmond and Wright in the electoral college.

Blockade - Running Cargo Planes Roar Into Berlin In Large Numbers

"NOBODY GOING TO PUSH US AROUND"

BULLETIN
BERLIN, Sept. 11.—(INS)—United States planes in the 24 hours ending at noon today flew into Berlin 3,453 tons of food and other supplies in 467 separate flights.
This was just under the 3,537-ton air lift record set by American airmen yesterday.

There was no indication of the interference threatened by Soviet authorities.

BERLIN, Sept. 11.—Amer-

ican blockade-running cargo planes roared into western Berlin in mounting numbers today in defiance of Soviet attempts to throttle the supply lifeline.

New and drastic Russian demands for detailed information in advance of each flight were brushed aside by American authorities.

One air force official disclosed the Soviet demand for data with the brusque warning: "Nobody is going to push us around in the air corridor and the Russians know it."

This attitude was mirrored in

BERLIN, Sept. 11.—(INS)—The Soviet propaganda chief delivered a blistering speech to German communists today and said this "force is the only answer" to the western allies.

The speaker was Col. Sergei Tulupov, long in obscurity in the Berlin scene who was believed to have been dismissed by his superiors.

He made a reappearance in troubled Berlin to address the Soviet-sponsored "congress" of the victims of fascism in advance of a huge communist mass demonstration scheduled for tomorrow.

It added that three battalions of 300 men each will patrol the Soviet-British boundary area at the Brandenburg gate where about 300,000 pro-western demonstrators

Nashville, Tenn., Sept. 11.—(INS)—Nashville is talking today about the greatest bird tragedy in the city's history.

More than a thousand birds were either killed or injured yesterday, apparent victims of the intense heat of a beacon light which they were circling.

The birds had flocked around the light because of a heavy overcast.

Observers said the birds included ducks and at least one Great Heron.

Food Trucks Are Again Rolling In New York City

Strike Of Food Truck Drivers Is
Settled; Other Truckers
Are Still Out

NEW YORK, Sept. 11.—(INS)—Food trucks began rolling today with supplies for chain outlets as a result of union agreements with major grocers reached late yesterday.

The agreements were made with ten companies and sent 1,400 of 9,400 striking truck drivers back to their jobs.

Smashing of a "solid employers' front against union demands was accomplished by tactics used by the union to break a 55-day deadlock in 1948.

The union cut down its 25-cent-an-hour wage boost demand to 17½ cents and accepted a modified health plan.

In return, the A. & P. stores, Bohack's, Peter Reeves and the Thomas Rouleau chain grocers agreed to sign contracts.

The union said the major break in the deadlock is expected to send another 600 men back to work by Monday.

Management representatives indicated, however, that most of the more than 7,000 strikers still unaffected by the sign-ups would be in for a long siege.

were fired on by Soviet forces after they had torn down the Soviet "victory" flag.

The Russians have scheduled a communist counter-demonstration for Sunday in the Soviet sector.

Complete Maneuvers
To the west of Berlin near Frankfurt, Anglo-American combat units completed the first phase of maneuvers against a potential "enemy from the east."

The Soviets had proposed that an hour's notice be furnished on each of the over 400 flights a day carrying supplies into the Soviet-blockaded western sector of the city.

The Russians also asked for the name of each pilot and the frequency of his radio signal.

London reports said that the British cabinet today ordered its special Moscow envoy to seek an early meeting with Russian leaders on the Berlin situation and to bring the "communist terror" to the attention of the Kremlin Chiefs.

Talks Recused
(The Moscow talks recused when the question of east-west differences in Berlin were referred to the military governors in Berlin.

London newspapers said the reason for the recuse in the Berlin talks was that Russia has increased conditions for an agreement to lift the blockade.)

Another account of Russian fighters over Berlin yesterday did not interfere with the Anglo-American "sky train."

U. S. airmen alone flew in 3,527 tons of food and other vital supplies in 472 flights during a 24-hour period yesterday to establish a new cargo record.

No Clues As Yet
Hollywood detectives have produced no tangible results.

Dr. Roney said that even if the actress recovers it probably will be another two days or so before she regains consciousness and several days after that before she can be questioned.

Just before she lapsed into unconsciousness the screen player mumbled that the hair dryer fell on her head.

The hood of the instrument weighs 35 to 40 pounds. Investigation disclosed that it could drop upon a person's head with considerable force, since the spring and screw which control its up and down range were defective.

However, investigators are almost certain that the hair dryer did not cause Miss Johnson's injury. A detective tried the device out on himself. While it jarred him, it caused no injury.

PUBLIC HEARINGS IN ATOMIC PROBE MAY BE DELAYED

vice-president of Remington Rand in charge of "advanced research," hinted that security on the atom bomb project had not been perfect.

Groves suggested that newsmen read up on the Canadian spy report who she was asked whether there had been "leaks" on the nation's atomic secrets. He added:

"If you have over 600,000 employees, as we did, are all 600,000 going to be perfect? Security depends on integrity. The conclusion is obvious. Anyone who talks you can get 600,000 perfect people just isn't intelligent."

The general, referring to military restrictions against discussion of atomic matters, emphasized that he had appeared before the committee in answer to a House subpoena.

Thomas would not identify the other witnesses who once were attached to the a-bomb project which Groves headed during the war. But he did say that one scientist was called in to examine "certain documents in connection with the atom bomb and this espionage case."

LARGE CROWD SEES NEW CASTLE HIGH OPEN GRID SEASON

(Continued from Page One)

men and young ladies—hundreds of them—must have eaten an early dinner, for the student stadium began filling by 6:45.

Over in the new steel stadium side the crowd was a little later, but then, adults can restrain their athletic fervor long enough to complete dinner. By eight o'clock the crowd of 10,000 was about in and the senior high school band marched on for a few musical capers.

The number the band used symbolizing the feeling of the football faithful, "Happy Days Are Here Again."

A Platform on Wheels
Joe Replogle was "up" with his band for the opener. There was a swing to it, a co-ordination to the parts, and a general high quality that speaks well for the musical end of sport in the school year. After centering the field the band formed a huge hour glass denoting "Time" and the 12 majorettes filtered down through the glass, headed by Jean Magee.

At half time the band took the field again, forming two huge "E's" for the Erie East song. Turning to the student section, the band formed a full moon and the band played "Harvest Moon." But what we would like to mention particularly was a wheeled platform effect which was rolled out like a chariot of some forgotten Caesar, which Mr. Replogle mounted to direct the band.

Big Aid to Band
For those in the know the gadget is known as a wheeled podium, and a mighty handy gadget it will be directing the bandmen on the field. It was the gift of the Universal Sanitary Manufacturing company, and if you know anything about directing 100 musicians on a level surface, you'll agree it has been needed for some years.

The band is composed of about half sophomores, but Joe Replogle had whipped it up to a point far beyond opening night performances of many years.

Out of 30 applicants for the majorette line-up the eight replacements chosen for this season are: Rose Linarella, Lucille Stone, Lucy Memo, Clara Zedic, Esther Stone, Joan Cubellis, Gloria Markiewicz and Irene Stone and Lucille Cook as alternates. Last year's majorettes in line are: Carol Parsall, Adele Bigley, Jeanne Magee, Shirley Moraldi and Mary Perrotta.

The night was one of those nights which seemed to have been tailored for the occasion. The weather was a wee bit on the warm side for the valiant down on the gridiron, but for the fans it was delightful.

It was opening night for the Red Hurricane, an old story to many of us but always a new one. Football was back for a season, the forty-eight model of the Red Hurricane was unveiled, and the fans were satisfied with what they saw. The one question at the end of the game was: "Are they as good as they looked?"

GRANT IS MADE FOR NEW CHURCH

(Continued from Page One)

ference as "New Castle Wesley Building Project" is similar to the Lakewood Methodist building program in Erie, when the church there was granted a like amount of money for building.

Nearing Fiftieth Anniversary
According to present plans, the new church will have ample parking facilities about it so that no

one need park on the street and a large playground area will be constructed in connection with the building program.

In 1950, Wesley Methodist church will celebrate the fiftieth anniversary of its founding. The church in which the congregation worships now was erected in 1902. Approximately 150 attend the church and with the new facilities it is anticipated that the membership will rise greatly. The present structure is badly crowded when services are conducted.

CEILING COLOR
Color applied to the ceiling of a room has a tendency to make the ceiling seem lower. If your ceilings are high and rooms large, use a dark ceiling; if ceilings are low and rooms small, a light ceiling is best.

MRS. N. AYERMAN FETED AT PARTY

Employees of the Gale restaurant and their friends honored Mrs. Nellie Ayerman, a co-worker, Wednesday evening, the occasion being her birthday anniversary.

The event was held at the home of Miss Helen McNulty, of Flamingo. A corn and wiener roast was enjoyed early in the evening, and following games and contests were featured during the social period.

Mrs. Ayerman was the recipient of many lovely and useful gifts in remembrance from her friends.

Demobilization Slowup
The demobilization slowup, when aimed in Parliament, may have a salutary effect upon certain troubled areas whether or not it affects the politico-military crisis in Germany.

Many observers, however, feel it is not unlikely that it may contribute some softening of the Soviet attitude.

Despite all their propaganda and charges of "warmongering" by the western allies, the Russians know

that the rank and file of Britons do not take to uniform with the same enthusiasm as in some countries of the European continent.

It is common knowledge that once slated for demobilization, the average Briton, like the American, really begins to loathe the sight of khaki. But once called back again, he will not be pushed around by anybody.

THE WORLD AND THE MUD PUDDLES

(Continued from Page Four)

with a great lawn running down to the Pacific Ocean, a whale of a place.

Now the State of Nevada is little known to Eastern tourists, but it is the only State in the Union that licenses unlimited gambling and possesses mighty mountains and tremendous valleys. Lake Tahoe is generally thought of as being in California. It is located six thousand feet in the air, partly in California and partly in Nevada. I refer you to Mark Twain's novel, "Roughing It" for a virginal description of Tahoe.

That was the story of Lake Tahoe a good many years ago, before the day of the automobile and paved roads. Today the Southern Pacific Railroad runs through Nevada, and from Reno to Truckee, California, about fifteen miles west of Tahoe with a switch back to Tahoe Tavern on the Northern end of the Lake. California was introduced rigorously by the Gold Rush of '49 and the people of America, thanks to the paved roads and the automobile, have awakened to the beauties of that gorgeous Lake. And thanks to the laws legalizing gambling in the State of Nevada hotel men have been induced to invest in extravagant layouts on the Nevada side of the Lake.

The first of these extravagant hotels was built by Sanford Adler who called his resort the "Cal-Neva", and it was not long until intrigued by the name of "Biltmore" some San Francisco promoters started the building of the Tahoe Biltmore, built on the same lines as that once famous hotel resort known as the Biltmore. Freddie Francisco, the interesting free lance writer for the San Francisco Examiner, writes a very interesting story of how the Tahoe Biltmore opened for trade in super de luxe style. The two paragraphs introducing his story are as follows:

"All of the deluxe, hand-painted, king-size, double-dipped, mauve-tinted and wired-for-sound characters this side of the Brooklyn Bridge were present the other night at the opening of the new Tahoe Biltmore at the Brockway end of the Lake.

One of These Events
"It was one of those events that every one HAD to make and did. The resort and cafe men were there to the operation and the show and the rest of the rest of their stay mumbling to each other, in corners, about how much they wished that the place would succeed, but 'How they ever gonna pay the trust, I'm asking yuh'."

It seems that the newspaper and radio virtuosos were present because the Tahoe Biltmore had imported them, and everything was on the House. All of the theatrical agents, at-liberty press agents, and assorted promoters in the region were on hand giving each other the old "What's doin'" routine, back-slapping the owners (their name is legion) and trying to figure a way in which to slice off a fee, or a chisel. The standing around in little clumps, obviously not too trustful of some of the more de luxe characters, were the Nevada people—the officials, the bankers and the local shots.

Tahoe Biltmore
The Tahoe Biltmore had been under wraps for a long, long time. If all of the shirts that have been lost in the deal were thrown in a pile, they'd add up to a full day's wash. Finally, the Blumfield Brothers of San Francisco came to the rescue with enough "moola" to put the last coat of paint on the woodwork, the fixtures on the walls, the plugs in the electric machine pay-off outlets and the staff to work. It was costing between eight and ten thousand dollars a day to keep the place open and Freddie observes that there is not that much incoming money available today, even with the free-handed spending of luxury loving possessors of income.

The promoters of this new hotel had engaged the Ritz Brothers (you know 'em) at an alleged cost of Twelve Thousand Five Hundred Dollars; at least, that is the cost as reported by Lou Irwin of Hollywood, which amount he claims he got for them without a gun, and which is not to say he would draw the line at firearms. Also in the show were the Maxello's (acrobats) "and ladies" Freddie says in his story, "who are trying to see the Biltmore show should wear suitable undergarments in case they plan to accept the Maxello's invitation to be

Bethel Baptists Plan Community Survey Next Week

Newly organized Bethel Baptist church, formerly the Hungarian Baptist church, Cunningham and Long avenues, plans a survey of the community in which the church is located in connection with the reeducation services of the church. The survey will be instituted on Monday, September 13, and will be continued through the week.

On Friday, a dedication banquet will take place, with Rev. Oliver W. Hurst, pastor of First Baptist church, as speaker. L. Butler Hennon, president of the Lawrence County Sabbath School Association, will bring appropriate remarks as will Paul Weller, president of the superintendents' council, and Jacob Wachtman of the Greater New Castle Association.

Sunday, September 19, at 11 a. m. and 7:45 p. m. the dedication will take place with Dr. G. A. Gabelman, executive secretary of the Pennsylvania Baptist convention, as evening speaker. The church will join in the daily day effort on that day.

The church, formerly known as the Hungarian Baptist church, has progressed greatly since it started in February, 1948 with a large Sunday school being operated. Seven have been baptized and 24 have been received into membership.

PLANE IN CRASH; CREW ESCAPES

MIDDLETOWN, Pa., Sept. 11.—(INS)—The failure of its brakes to hold on a wet runway was blamed today for the crash of an air force B-17 at Olmsted Air Force Base at Middletown.

The heavy bomber's five-man crew escaped injury when the plane skidded 3,000 feet and crashed into a revetment at the edge of the field, air force spokesmen said. The huge aircraft broke at its midsection from the force of the impact.

The plane, based at Middletown, was enroute from Bedford, Mass., where it had been assigned to the Massachusetts Institute of Technology for testing weather equipment under flight conditions.

A poison so strong that four ounces in the water supply of a city of 75,000 persons would kill all of the inhabitants, is reported as having been isolated at North-western University.

Rev. T. J. Jones To Return To Pulpit

Rev. Thomas J. Jones, pastor of First Congregational church, will return to his pulpit Sunday morning after vacationing at Ocean Grove, N. J., where he attended the Bible conference, held under the auspices of the Methodist association. Rev. Jones listened to outstanding preachings of England and this country, among them being Dr. Herbert Dunning of London and Dr. Sidney Baxter of Edinburgh.

The local minister will profess his morning message at 11 o'clock with a brief review of the decisive action of the National Council of Congregational Christian Churches at Oberlin, O., on the merger with the Evangelical and Reformed churches, forming the United Church of Christ. The local congregation voted unanimously for the merger.

Thirteen New U. S. Airplanes During Year

By GEORGE MOISE

(U. S. Staff Correspondent)

WASHINGTON, Sept. 11.—The Air Force announced that it has introduced 13 new air planes—including some of the world's largest and some of the fastest—in the past year.

In announcing its accomplishments during its first year of autonomy, the USAF boasted of development of the world's largest transport, the first parasite jet fighter, and of penetration of the speed of sound with a special "flying laboratory", the rocket-powered Bell X-1.

Most Sensational Plane

Perhaps the most sensational plane developed during the year is the North American F-56, which set an unofficial world's speed record of nearly 670 miles an hour at the Cleveland Air Races last week.

The X-1 carries no military equipment other than the pilot, but it has exceeded the speed of sound, 760 miles per hour at sea level, by a considerable margin many times.

In the bomber field the Boeing XB-47 was flown successfully. The XB-47, like the F-56, has a sharply swept back wing. It is powered with six jets, two of them at the wing tips and the other four slung under the wings in pairs near the fuselage.

The XB-47 has an announced speed of approximately 500 miles per hour, and, with built-in rocket assistance, can climb from take-off at an apparent angle of more than 45 degrees.

Parasite Fighter

The parasite fighter developed is the McDonnell XF-85, which has no landing gear, but is launched from and recovered by a modified bomber while in flight.

Parasite fighters have been developed before, particularly in connection with dirigible launching, but the XF-85 is the first such plane to be put powered.

Also completed and successfully test flown during the year was the Northrop B-49, a jet powered flying wing bomber, a plane whose possibilities are unlimited because of the aerodynamic efficiency of flying wing design.

In the transport field, the USAF accepted delivery of the Consolidated Vultee XC-99, the world's largest land plane. It is the transport version of the immense B-36 bomber, with the same wingspread, 230 feet. But it is both higher, and longer than the B-36.

The XC-99 can carry either 400 completely equipped combat soldiers or 50 tons of cargo.

An iron ore field in Labrador is believed to be as rich as and larger than the fabulous Mesabi deposits in Minnesota.

As soon as the Fall rains come, there will be an army of hunters take to the fields, not for game but to hunt mushrooms that grow in the night.

Today in Eastern North America there are several kinds of mushrooms that are not fit for food and have the power to cause death. One of the deadliest of wild fungi is the Fly Amanita. It is a mushroom of a yellowish shade, ranging from an orange to a whitish color with raised spots or scales all over its cap. The Fly Amanita grows on the edges of shaded woods, but it is well to know that it is possible to find it growing on your lawn. Its name is derived from the fact that when flies light upon it they die instantly. The Fly Amanita is alkaloid. Like the venom of the rattlesnake, it does not begin to show effects until it is too late to do anything for the victim that has eaten it.

Another widespread mushroom is the Deadly Death Cup, which grows to a height of seven inches. The cap is smooth and sticky and there are gill rings on the long stem below the cap. This Amanita is the most poisonous of all mushrooms. In most places it covers the ground among the pine trees. There is no known cure for those who eat the Death Cup.

There are more than 2,000 different kinds of mushrooms or toad stools that grow in the woods and fields in the Spring and Fall, many of which can be found in Lawrence county.

Among this number are over 20 species of poisonous Amanitas. All of these have a mark of warning. They grow out of a bulbous cup and have gill rings that are either yellow or with white spores. Even

so, some of these deadly mushroom look like the edible ones. The symptoms of mushroom poisoning are vomiting, the bowel discharge is watery and contains blood spots. A dizziness will strike the victim, the skin gets clammy and cold, and dreadful convulsions will take place. At the first sign of mushroom poisoning take an emetic at once to cause vomiting then send for a doctor.

This fall when gathering mushrooms be sure you know the safe ones from the deadly kind.

Question: Should the ushers at a wedding be chosen from among the bride's or the groom's friends?

Answer: Usually the ushers are friends of the groom, but not necessarily so. They may be a combination of both. When they are predominantly the groom's friends, usually one at least is a member of the bride's family, just as the bridesmaids usually include a member of the groom's family.

Question: We are going to celebrate our fifth wedding anniversary. Please give me the following information: (1) Would it be proper to have a bride and groom on the wedding cake? (2) What should I say on the invitations? (3) Would it be correct to mention on the cards that this is our Wooden anniversary? (4) What kind of refreshments should we serve?

Answer: (1) Yes. (2) You must send out informal or visiting card invitations stating the time, the date and the place, or perhaps you might find some appropriate cards for a wooden anniversary in a stationery store. (3) Yes. (4) Serve a buffet supper of cold meats, cheese, a salad, rolls, coffee and cake.

Question: I have received a number of shower gifts for which I verbally thanked the donors. Must I now write a note to each again thanking her?

Answer: It is not entirely necessary but it is a thoughtful gesture, always, appreciated.

Present your problems to Miss Markel who will promptly send personal replies to questions from readers inclosing stamped, addressed envelopes.

Laws Should Not Hamper Progress In Transportation

Transportation has been a progressive thing since the days of the ox-cart. The canals came and they were progress in those days. The railroads came and they were more progress.

Modern transportation today requires motor trucks for speed of delivery, for service to isolated points, for convenience and certainty of getting merchandise when it is needed.

Certainly laws should not serve to hamper progress. Yet the present laws do just that. Laws should keep pace with progress, with modern inventions and developments.

In the days of the solid tire truck perhaps the laws on the books were adequate. But not today with the efficiently engineered trucks that are being turned out, yet many of the old laws still govern. It's time to catch up with modern times.

State Forest Fire Season Now Nearing

By JACK WARD

(U. S. A. Staff Correspondent)

HARRISBURG, Sept. 11.—The fall forest fire season today was expected to produce the lowest number of woodland blazes on record.

The Department of Forests and Waters reminded Pennsylvanians that the dropping of leaves and death of ground vegetation in the next few weeks will signal the start of the fall burning season.

"Fires which burn during this fall season generally are the most damaging type," the department said. "They burn deep in the ground killing every living thing in their path."

The danger of widespread forest conflagrations will exist until the first snowfall.

Six-hundred and fifty blazes reported during the spring season were the lowest number on record according to Horace B. Rowland, chief of the Division of Protection. The 11,045 acres of timberland destroyed in spring fires also was the lowest on record. Damages were estimated at \$25,200 and costs of extinguishing the fires at \$21,120.

Much To Be Done

"Although the citizens of Pennsylvania can be justly proud of the spring season's record, there is still much to be done," he said. "Our efforts and those of the citizens must be redoubled if complete elimination of forest fires is to become an actuality."

Rowland pointed out that more than 80 per cent of the timber fires in Pennsylvania last year occurred during a two-week dry spell in October. More than half of the conflagrations were caused by the carelessness of smokers, tourists, hunters, fishermen and children.

During the same period, more than \$2,000,000 damage was caused in the New England states where disastrous fires swept 200,000 acres of timberland and many communities.

"This disaster, as well as 99 per cent of all forest fires, can be prevented if all persons are careful," Rowland said. "The elimination of forest fires, together with the waste and damage that goes with them, can only come about as a result of the combined efforts of all the people."

Nearly 4000 fire wardens have been alerted and outfitted with the latest types of equipment for the approaching season. In addition, more than 22,000 volunteers are being recruited to aid regular fire fighters in emergencies.

Senator Martin Outlines Republican Program

PITTSBURGH, Sept. 11.—(INS) U. S. Senator Edward Martin (R., Pa.) today outlined a 10-point program he said a Republican president and congress would employ to lick and curb Communism.

In a speech prepared for delivery to the Republican State Committee meeting at Pittsburgh, he blamed the Democratic administration for high prices and for concealing the cause of inflation from the American people.

The special session had been called, he alleged, "for the sole purpose of blaming the 80th Congress for all the years of Democratic blundering and bungling."

Martin listed as two of the "big factors" of inflation the \$17 billion European recovery program drawing food from domestic markets and the \$14 billion national defense program.

"Both of these vast undertakings were forced upon the United States by stupid, incompetent bungling and fumbling that risked the future of America to appease the Communist dictators," Martin declared.

"Today we are paying the price," he said. "Today the bewildered and confused Democratic party seeks to save itself by shouting 'Blame the 80th Congress.'"

A Republican administration would operate the recovery program "under the mandate set forth in the act to minimize the drain upon the resources of the United States," Martin asserted.

It would establish a policy of

THE MAN ON GUARD

THERE is an individual in every modern city who stands guard over the health of the people. This man is the water works chemist or laboratory technician. Upon his shoulders rests the important duty of analyzing and testing the public water supply.

Every day he tests the water as it comes from the source of supply and after each step of the purification process. His tests determine the amount and kind of treatment required to make the water that is delivered to your home always pure, always wholesome, and always SAFE.

CHICAGO, Sept. 11.—(INS)—It took three years, three sets of owners, lots of coaches and dozens of players, but the Chicago Rockets have finally become a major league football club.

The Rockets, quoted underdogs officially at 10½ points and unofficially at up to 20, bested the bad breaks and defeated the Baltimore Colts, 21 to 14, for their first All-America Football Conference win of the season.

Pep Is Winner In Garden Bout

NEW YORK, Sept. 11.—(INS)—Promising young fighters may come and go, but Willie Pep goes on forever just like Tenyson's brook.

The veteran featherweight champion from Connecticut gave Paddy De Marco, Brooklyn lightweight, a boxing lesson in a ten-round, non-title bout at Madison Square Garden last night.

Pep won the unanimous decision in going through his 71st straight fight without a defeat. Willie made De Marco look like a novice, although Paddy had run up a long winning streak himself.

The winner was a strong favorite. A crowd of 9,810 paid \$30,000 to see the bout.
